## Personal Summary

I love interacting with people, dogs, and problem solving. I have an innate desire to learn and excel in a work environment that challenges me to continually learn new skill-sets. I have worked in the restaurant/hospitality industry for a number of years and I am looking to combine these skills with my new knowledge gained at Nashville Software School to become an energetic, innovative, and productive member of a software development team.

## Core Skills

- JavaScript
- React
- Prism.js
- .NET
- C#
- Version Control
- Agile

## PROJECT 1 CPR COPY-PASTE- REFACTOR

[Github Repo](#)

This single-page app has full CRUD functionality and was created utilizing React, React Router, and API fetch calls to JSON server. Styling was achieved through CSS, and Reactstrap to create a simple, user-friendly experience. Prism.js was utilized to create code snippet documentation for users chosen code snippets. Users have the ability to comment on other users created code snippets.

- Application to keep track of code snippets from past projects
- React used on the front-end and Prism.js used to display code formatting
- Users can create, edit, and delete their code snippets
- Filter code languages to pinpoint a specific code snippet

## PROJECT 2 BACK END CAPSTONE

[Github Repo](#)

This single-page app has full CRUD functionality and was created utilizing React, React Router, and API fetch calls to JSON server. Styling was achieved through CSS, and Reactstrap to create a simple, user-friendly experience. Prism.js was utilized to create code snippet documentation for users chosen code snippets.

- Application to keep track of code snippets from past projects
- React used on the front-end and Prism.js used to display code formatting
- Users can comment on other users Code Snippets
- Users can create, edit, and delete their code snippets

## Work History
